

UC Information Technology Committee
Annual Goals, September 2020-August 2021

1. Review email accounts – Consider switching everyone to Outlook (students, et al).
2. Consider options that address the cost of premium software products needed by students when they are unable to use seat licenses on campus such as Adobe products.
3. Replace Qualtrics with Microsoft Forms. Consider the balance of cost impact and software platform.
4. Review topic submissions referred by UCEC and other requests related to university IT matters.
